OBJECTIVE

Fullstack Web Developer (React / Node.js / React Native)

EDUCATION

Bachelor's in Computer Science, Yuriy Fedkovych Chernivtsi National University
Sep 2021 – Jun 2025

SKILLS

Frontend: HTML5, Tailwind CSS, JavaScript/TypeScript, Next.js (App Router), React Native (Expo), Redux Toolkit, React Hook Form, Framer Motion, Yup

Backend: Node.js, Express, NestJS, REST APIs, WebSocket (NestJS Gateway), JWT, Stripe & Webhooks, node-cron, PM2, Redis, RabbitMQ

Databases: PostgreSQL (Prisma), MongoDB (Mongoose), Supabase

DevOps/Cloud: Docker, Kubernetes (AWS EKS), GitHub Actions, GitLab CI, Vercel, Railway, AWS EC2/S3, NX monorepo

Tools & APIs: Git, ESLint, Prettier, Jest, Telegraf (Telegram API), Discord.js, Turnstile, Mapbox, SendGrid, Twilio, Sentry

EXPERIENCE

JavaScript Developer

Sep 2024 – Present

MeetMap — Remote (Netherlands)

- Built web (Next.js 14 + Redux Toolkit) and mobile (Expo) clients for event creation, discovery, and booking with Framer Motion animations and Tailwind styling.
- Implemented secure JWT auth, email (SendGrid) and SMS (Twilio) verification with TTL codes; integrated Stripe payments via webhooks.
- Developed a NestJS WebSocket gateway for real-time chats (read receipts, typing, reconnect) and backend microservices (auth, events, notifications, chats) on PostgreSQL/Prisma.
- Integrated Mapbox for geocoding, custom markers, clustering, and distance filtering.
- Leveraged Redis for caching session data and chat state to reduce database load and accelerate response times.
- Used a message broker (RabbitMQ) for asynchronous task processing—such as sending notifications and background jobs—to decouple services and improve scalability.
- Deployed on AWS EKS with autoscaling; managed CI/CD via GitLab CI (build, lint, test, deploy); local Docker setup; NX monorepo.
- Set up error monitoring with Sentry.

Fullstack Developer (Freelance)

Sep 2024 – Mar 2025

Self-Employed — Remote

- Delivered 6+ full-stack projects (landing pages, admin panels, Telegram/Discord bots, websites) from requirements to launch.
- Developed clients in React/Next.js and servers in Node.js/Express; styled with Tailwind; data on PostgreSQL (Prisma) and MongoDB.
- Built bots using Telegraf and Discord.js with webhook integration, message scheduling via node-cron, and Turnstile anti-bot.
- Implemented JWT auth, role-based access, data validation (Yup), and Stripe payment flows.
- Automated CI/CD with GitHub Actions (build, lint, tests); containerized with Docker; deployed to Vercel, Railway, and AWS EC2.

PROJECTS

- **E-Commerce System:** Angular, Spring Boot, PostgreSQL, Stripe, Docker; CI/CD pipelines.
- **Telegram Raffle Platform:** Next.js, Prisma, node-cron, Turnstile; Railway + GitHub Actions.
- **Freight Services Landing:** Next.js 14, Framer Motion, Telegram API; SSR-optimized; Vercel.
- **Cybersecurity Course Page:** Next.js App Router, Supabase CMS, next/image, Sitemap; Vercel + GitHub Actions.
- **Bulk Messaging Bot:** Telegraf, Supabase, rate limiting; AWS EC2.
- **Discord Forwarder:** Discord.js, PM2; AWS EC2.

ACHIEVEMENTS

- Delivered 6+ production-ready platforms used by real clients, ranging from admin panels to bots.
- Accelerated release cycles through automated pipelines and standardized workflows.
- Enhanced system reliability with comprehensive error monitoring and automated recovery strategies.
- Elevated code quality by implementing unit and integration tests and enforcing code reviews.
- Spearheaded real-time chat and map feature integrations to enrich user experience.

LANGUAGES & SOFT SKILLS

Languages: Ukrainian (Native), Polish (B2), English (B2)

Soft Skills: Communication, Teamwork, Problem-Solving, Self-Motivation, Fast Learning
